TITLE : LOCKING DEVICE OF WIRE ROD

ABSTRACT : PURPOSE: To improve winding stability of a wire rod by suppressing twisting back of the wire rod, by a simple structure.

CONSTITUTION: A locking device of wire rod is provided between a winding drum 3 consisting of a winding cylinder 1 provided so that the cylinder can be rotated freely and flange plates 2, and a caterpillar 41 for supplying a wire rod 5 to the winding drum 3. The wire rod is sandwiched between them and is guided to the winding drum 3 in such a way that the rotation around the axial line of the wire rod is inhibited.
